

Rich Brilliant Willing

Course description

Designing functional light with decorative luminaires.

This one-hour CEU program discusses how today's decorative luminaires can – and do – provide functional lighting for commercial applications.

Beginning with discussion of different lighting effects (and how to describe them), we will look at various techniques for applying and integrating decorative luminaires to functional lighting needs.

We will conclude with guidelines to luminaire selection according to light output, direction, and color.

Functional Lighting Decorative Luminaires

Certified Continuing Education

Learning objectives

At the end of this program, participants should be able to:

- Clearly describe functional lighting effects.
- Apply functional lighting techniques using decorative luminaires.
- Integrate decorative luminaires into common architectural applications.
- Select decorative LED luminaires for light output, direction, and color.

Course outline

- Functional *and* Decorative
- Layers of Light
- Fundamentals for Functional Lighting Design
- Strategies for Pleasing Light
- Evaluating and Selecting Luminaires
- Application Examples
